

Lithium Complex Red EP2 Grease (HA500730) – Technical Data Sheet

Description

A specially developed multi-purpose lithium complex grease for lubricating all anti-friction and plain bearings for use in industrial and automotive applications. The grease has shown exceptional performance providing extended lubrication intervals over wide operating temperature range.

Outstanding Features

Exceptional mechanical stability extends relubrication intervals
Excellent oxidation stability provides lasting lubrication at high temperatures
Excellent EP and anti-wear performance
Good corrosion resistance protects components operating in wet conditions

Directions for Use

LITHIUM COMPLEX RED EP2 can be applied manually, or by using a standard grease gun, or via a central lubricating system designed for and capable of pumping an NLGI No.2 grease; consult a qualified centralised lubrication system engineer before installation. As with all greases used for the first time, check compatibility with the grease applied previously and if necessary, purge bearings prior to application. Likewise, as a rule, take care not to over-lubricate and apply the quantity of grease recommended by the bearing manufacturer.

Technical Data

Appearance - Smooth adhesive grease
Colour - Red
NLGI Classification - 2
Thickener - Lithium complex
Base Oil - Solvent refined mineral oil
Base oil viscosity @ 40°C (IP71) cSt - 150 min
Worked penetration (IP50) - 265 to 295
Dropping point (IP132) °C - 250 min.
Oil separation (IP121) % - 5 max.
Copper corrosion (IP112) - Pass
Resistance to corrosion EMCOR (IP220) – 0 : 0
Water washout (IP215) @ 38°C % - 3
@ 79°C % - 4
Four Ball Weld Load (IP239) kgs - 400
Wear load index - 62
Timken OK load (IP326) kgs (lbs) - 20 (45)
Operating temperature range: - -20°C to +150°C
